

# CHARLES WIJAYA

DATA SCIENCE AND ANALYTICS | PETRA CHRISTIAN UNIVERSITY

## OBJECTIVE

To enhance my skills in iOS development and software engineering by joining Apple Developer Academy, where I can learn industry best practices, collaborate with multidisciplinary teams, and build real-world applications that align with Apple's values of innovation and user-centered design.

## SKILLS

I'm good at breaking down complex problems into clear, simple steps. I enjoy finding patterns and turning them into something useful. What sets me apart is my curiosity and willingness to ask questions, and I genuinely enjoy learning from others to create better outcomes together.

## EXPERIENCE

### BUSINESS ANALYST • SAMUDERA BIRU • JAN 2025 – JUN 2025

I am working as a Business Analyst Intern, where I assist in streamlining business processes between Samator branches following the recent migration to a new ERP system, Epicor. In addition, I contribute to the integration of Epicor with third-party vendors by supporting the development of APIs.

## EDUCATION

### BACHELOR OF SCIENCE IN DATA SCIENCE AND ANALYTICS • EXPECTED AUG 2026 • PETRA CHRISTIAN UNIVERSITY

GPA: 3.96 / 4.00

Relevant Coursework: Big Data Analytics, Machine Learning, Cloud Computing, Database Systems, Software Engineering

## VOLUNTEER EXPERIENCE OR LEADERSHIP

In the Capstone project, I took the lead in coordinating the backend development team. I organized our workflow, delegated tasks, and made sure we stayed on track with deadlines. I also helped bridge communication between the backend, frontend, and machine learning teams to ensure smooth integration. Leading this project taught me how to manage responsibilities, keep the team aligned, and solve problems together under pressure.
